

DESIGNATED PARKING AREAS

In response to feedback from Rounding and Brown Bags concerning issues with patient parking during high volume winter census associates are being asked to review employee parking policy. This Pulse insert is a reeducation tool and beginning February 1st associates found parking in customer parking, may be issued a warning ticket. **Please encourage your staff and peers to park in designated employee parking!**

This map indicates specific parking for employees, physicians, and patients/visitors. Non-compliance with our parking policy could adversely affect our patients, their families, and our visitors.

Questions regarding designated parking areas can be answered by Security (ext 4571), Human Resources (ext 4253), and Management staff (ext 4437).
